

## **California State University – Long Beach**

### **Core Courses with skills:**

Ethnographic Methods

Quantitative Methods

Proseminar (Proposal Development, Grant Writing, IRB writing)

### **Electives Available to Graduates**

Applied Anthropology

Medical Anthropology

Global Ethnography

Graduate Level Linguistics

### **Key Skills and Values:**

Understanding the history and development of discipline

Learning the basics of program evaluation

Learning qualitative and quantitative research skills

Learning the art of writing: abstracts, resumes, grant proposals, theses

Learning to present work in professional venues (e.g. poster making, speaking)

Engaging students in regional and national networks

Promoting critical thinking

Engaging students in discussion of research and professional ethics

Learning to negotiate with IRBs

Promoting foreign language competency

Understanding professional roles and potential areas of practice

### **Future Goals/Areas of Weakness:**

Developing a film lab and teaching students how to make ethnographic films

Incorporating more computer-based methodological tools like Atlas.ti

Teaching students how to publish, impact policy. (faculty have to learn this first!)

Teaching GIS, Rapid Assessment Techniques

Linking theory to practice more effectively

Making internships more effective.

### **Areas of Concentration:**

Medical

Education

Community Development
